**Consistency Notes:**

Delta, Delta_Android, and Delta_Biomorph need to be distinguishable as the same character. Using consistent color schemes will be very helpful in accomplishing this. The same applies to Justine, J.E.S.S. and jU5t33Nz, however it is less important for them to be realized as a single entity as opposed to aspects of Delta that are going haywire (soul, body, mind, respectively).

Below are two tables showing where colors should match.

Proper texturing should be utilized to give different materials of the same color the proper feel. For example, Shiny White Plastic Alloy looks and feels different than Jagged Rigid Bone Fragments.

Also note ALL robots and cyborgs have similar pieces that share a similar color scheme. J.E.S.S. and Delta_Android share a similar body structure comprised of a similar material. Merlin and J.E.S.S. have the same dark green tubing (as well as the same color skin). Merlin and Delta both have one red eye, which jU5t33Nz also mimics.
